COHO ESG US Large Cap Equity Fund (the "Fund"), a sub-fund of the Candoris ICAV (the "ICAV")

ISIN: IE0005CAWMP0 GBP Hedged Institutional Class - as per Supplement

This Fund is managed by **Waystone Management Company (IE) Limited (the "Manager")**

Objectives and Investment Policy

The objective of the Fund is to achieve a return greater than the S&P 500 Index by investing in US equities while seeking to promote environmental, social, and governance ("ESG") characteristics. The Fund invests primarily in the equity securities of companies established, listed or traded in the United States of America. The Fund's investments undergo an ESG-related review to help to determine their potential eligibility for inclusion in the Fund's investable universe. ESG factors utilised in the review process reflect a variety of key sustainability issues and span a range of metrics. The Fund may also invest in equity related securities such as Global Depository Receipts (GDR), American Depository Receipts (ADR), International Depository Receipts (IDR) and European Depository Receipts (EDR). It may also keep up to 20% of its Net Asset Value in cash or cash equivalent instruments such as short-term government obligations and fixed income government bonds with a minimum rating of Aa+ (Moody's, Fitch, S&P).

The investment policy is based on the expectation that the most effective way to create and sustain wealth in the equity market is to achieve an asymmetric pattern of return over time, where the portfolio aims to go down in value less in times that equity markets decrease in value, while capturing most of the upside performance.

The primary focus of the investment manager is on risk control and declining in value less than the overall US equity market in the down markets. A close second focus is on participation in most up markets. In case this combination of declining less in value in down markets and participation in most up markets is achieved, this is expected to lead to better than market performance over an economic cycle with less than market risk. Measured over a period of several cycles, the Fund aims to achieve a return greater than the overall US equity market as defined by the S&P 500 Index.

The Fund is actively managed and the choice of investments is not made by reference to a benchmark. The Fund's performance is compared to the S&P 500 Index (the "Benchmark"). The Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities, which are not constituents of the Benchmark.

You can sell your participation in this Fund back to the Fund on any business day in Ireland on which the value of the shares is calculated. The Fund does not declare dividends.

The Fund may not be appropriate for investors that aim to withdraw their money within 5 years.

Risk and Reward Profile

The Fund is ranked in risk and reward category 6.

Why is the Fund in this category?

This indicator is based on historical data of the Investment Manager and may not be a reliable indication for the future risk profile of the Fund. The risk category shown is not guaranteed to remain unchanged and may shift over time. Even the lowest category 1 does not mean a risk free investment.
