SIM US High Yield Opportunities Fund (the "Fund"), a sub-fund of the Candoris ICAV (the "ICAV")

ISIN: IE00BF1XKR94 Euro Hedged Institutional Class (Cap) - as per Supplement

This Fund is managed by KBA Consulting Management Limited (the "Manager")

Objectives and Investment Policy

The Fund's investment objective is to seek: (i) high current income; and (ii) capital appreciation. The Fund seeks to implement its investment objective by primarily investing in a diversified portfolio of fixed income securities which may be fixed and/or floating rate, of any maturity and that are generally rated below investment grade (i.e. rated as Ba or lower by Moody's Investors Service, Inc. or BB or lower by Standard & Poor's Ratings Services or Fitch, Inc.) or deemed to be below investment grade by Strategic Income Management, LLC (the "Investment Manager") or unrated. These types of securities are commonly referred to as "high yield" or "junk" fixed income securities.

The Fund has no limitations regarding the maturities of the fixed income securities or the market capitalisation of the issuers in which it invests or whether those fixed income securities are rated or unrated. The securities in which the Fund invests may be issued by corporates, governments, international agencies, or supranational entities.

The Fund will typically allocate, under normal circumstances, at least 80% of the Fund's net assets in non-investment grade or unrated fixed income securities and/or financial derivative instruments that provide exposure to non-investment grade or unrated fixed income securities, namely fixed income futures and credit default swaps. The Fund will focus on making investments in securities of US issuers but may also invest in the securities of issuers in any country globally, and up to 35% of the net assets of the Fund may be exposed to non-US issuers. The Fund will also utilise currency futures and forwards for hedging purposes with the aim of decreasing risk by hedging the Fund's currency exposure on non-US Dollar denominated investments and also to implement the share class currency hedging arrangements.

While the Fund will predominantly take long positions up to 100% of the Net Asset Value of the Fund, it may also take short positions

when in the opinion of the Investment Manager, opportunities exist to meet the Fund's investment objective through the use of short currency future, currency forward positions, short treasury future positions and by selling or purchasing credit default swaps.

The Investment Manager has three principals in selecting investments in issuers. First, in selecting its investments the Investment Manager seeks to gain exposure to issuers operating in industries with positive long-term trends. Second, the Investment Manager seeks to avoid investing in issuers operating in industries it considers ill-suited to high levels of leverage. Finally, the Investment Manager analyses investments from the perspective of a chief financial officer of that issuer. The resulting selections comprise the Fund's "core" portfolio which tends to be less capital intensive and less cyclical overall than the general high yield market. In addition to this "core" portfolio, the Investment Manager will also opportunistically seek to invest in issuers operating in "out-of-favour" industries. The Investment Manager has also historically invested about one-third of the portfolio in "smaller issuers", that is, issuers with total bonds outstanding of \$500 million (or currency equivalent) or less.

The Fund does not declare dividends in respect of this class of Shares.

The Fund is actively managed and the choice of investments is not made by reference to a benchmark. The Fund's performance is compared to the ICE BofAML US High Yield Index (the "Benchmark"). The Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities, which are not constituents of the Benchmark.

You can sell your participation in this Fund on any business day in Ireland on which the value is calculated.
