This document was published on 30 July 2024.

You are about to purchase a product that is not simple and may be difficult to understand.

## What is this product?

### Type

This product is a UCITS Fund.

### Term

The Fund has no maturity date.

### Objectives

#### Investment objective

The investment objective of the Fund is to seek long-term capital appreciation.

#### Investment approach

The Fund will pursue its investment objective by investing at least 80% of its net asset value, and up to 100% of its net asset value in a diversified portfolio of equities and equity-related securities from companies operating in countries classified as Emerging Markets or Frontier Markets.

#### Investment policies

The Fund will primarily invest in a diversified portfolio of equities and equity-related securities. The Fund may also hold up to 20% of its net asset value in cash or ancillary liquid assets and up to 10% of its net asset value in investments in collective investment schemes.

The Fund will invest in emerging market countries that are typically those of poorer or less developed countries and other countries which typically exhibit lower levels of economic and/or capital market development, and higher levels of share price and currency volatility. The Fund may also invest in frontier market countries, which are a subset of and are the least developed amongst the emerging market countries, with less developed capital markets and lower liquidity.

The Investment Manager follows a bottom-up fundamental analysis approach to uncover investment opportunities in emerging markets, performing in-depth research for each potential investment opportunity, taking in consideration expected returns and risks. The Investment Manager seeks to manage the risk profile of the Fund through diversification of investments by country, sector and company and by paying a fair

price in relation to its estimates of the underlying businesses value, as determined by the Investment Manager.

The Investment Manager aims to exploit inefficiencies in emerging markets across the spectrum of market capitalisation.

The Investment Manager will seek to concentrate the Fund's investments in what it believes to be best, highest conviction ideas in emerging markets where the Fund may generate positive return on investment over the long-term.

#### Benchmark uses

The Fund is actively managed and the choice of investments is not made by reference to a benchmark. The Fund's performance is compared to the MSCI Emerging Markets Total Return Net Index (the "Benchmark"). The Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities, which are not constituents of the Benchmark.

#### Redemption and Dealing shares

You can buy and sell shares on any business day (generally a day in which banks in Ireland or New York are open) on which the value of the shares are calculated, exceptions to this are more fully described in the fund holiday calendar available from the Administrator.

#### Distribution policy

This share class does not pay out a distribution. Any investment income generated will be reinvested.

#### Intended Retail Investor

This Fund is designed for retail and institutional investors seeking pooled exposure and who are comfortable with a higher level of investment risk. It is expected that the Fund will be held as part of a diversified portfolio of investments. This Fund has been designed to form part of a broader portfolio of investments. It may also be suitable as a significant component of an investors overall portfolio and should be purchased with advice or on an execution only basis by a basic investor. Investors must be able to bear loss of capital in order to seek to generate higher potential returns.

## What are the risks and what could I get in return?

### Risk

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions could impact the value of your investment.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at [www.candoris.nl](http://www.candoris.nl)

This product does not include any protection from future market performance so you could lose some or all of your investment.

## Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 5 years. Where the Fund does not have 5 years of historical data, the relevant benchmark data is used. The stress scenario shows what you might get back in extreme market circumstances.

Recommended holding period		5 years		
Investment		\$ 1,000,000.00		
Scenarios		If you exit after 1 year	If you exit after 3 years	If you exit after 5 years <small>(recommended holding period)</small>
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.				
Stress	What you might get back after costs	\$ 672,699.10	\$ 487,132.54	\$ 363,904.26
	Average return each year	-32.73%	-21.32%	-18.30%
Unfavourable	What you might get back after costs	\$ 944,368.49	\$ 578,303.08	\$ 645,250.91
	Average return each year	-5.56%	-16.69%	-8.39%
Moderate	What you might get back after costs	\$ 1,114,546.53	\$ 826,446.27	\$ 1,069,569.98
	Average return each year	11.45%	-6.16%	1.35%
Favourable	What you might get back after costs	\$ 1,315,732.17	\$ 1,182,068.50	\$ 1,767,258.26
	Average return each year	31.57%	5.73%	12.06%

## What happens if Candoris ICAV is unable to pay out?

If the Candoris ICAV are not able to pay you out what is owed to you, you are not covered by any national compensation scheme. To protect you, the assets are held for safekeeping in accordance with the UCITS Regulations with a separate company, a depository. In worst case, however, you would lose your entire investment.

## What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the moderate scenario.

		If you exit after 1 year	If you exit after 3 years	If you exit after 5 years <small>(recommended holding period)</small>
Investment:	\$ 1,000,000.00			
<b>Total costs</b>		\$ 9,500.00	\$ 29,278.90	\$ 49,464.97
<b>Annual cost impact (*)</b>		0.95%	0.95%	0.95%

(\*) This illustrates how costs reduce your return each year over the holding period.

**Composition of costs**

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
<b>Entry costs</b>	We do not charge an entry fee for this product, but the person selling you the product may do so.	0
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	0
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
<b>Management fees and other administrative or operating costs</b>	The management fees and other administrative and operating costs are fixed. These fees and costs are discharged from the fund for exactly this specified level.	\$ 9,500.00
<b>Transaction costs</b>	0.26% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments of the product. The actual amount will vary depending on how much we buy and sell.	\$ 2,600.00
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
<b>Performance fees</b>	There is no performance fee for this product.	0

**How long should I hold it and can I take money out early?****Recommended holding period: 5 years**

The Fund is designed to be held over the medium term and we recommend that you hold this investment for at least 5 years.

You can request to take out some or all of your money at any time, without penalty, or hold for a longer period. You can typically request to buy or sell shares in the Fund on any business day in Ireland or New York subject to the terms set out in the section 'Key Information for Buying and Selling' of the Funds' Supplement (which together with the prospectus constitutes the Prospectus).

**How can I complain?**
