What is this product?

Type

This product is a UCITS Fund.

Term

The Fund has no maturity date.

Objectives

Investment objective

The investment objective of the Fund is to seek long-term capital appreciation.

Investment approach

The Fund will pursue its investment objective by investing in normal market conditions at least 80% of its net asset value in US equity securities of small capitalisation traded on a Recognised Exchange.

Investment policies

The Investment Manager utilises direct research to identify and invest in companies with strong organic revenue growth that can be sustained for long periods of time and drive a compounding of company value over time. Direct research involves a detailed analysis by the portfolio managers of publicly available information on the investee companies which the Investment Manager uses to build proprietary financial models on each holding.

The key fundamental aspects sought for in an investment are: Superior Top-Line Revenue Growth; Large and Expanding Market Opportunity; Leadership Position; Economies of Scale; Strong Management Team. The portfolio management team is multi-disciplined meaning that all the portfolio managers have expertise with and operate collaboratively on all aspects of the investment process for the portfolio.

The investments of the Fund will not be selected from any specific industry.

The Fund will invest in companies in multiple sectors in

the economy, as long as the Investment Manager's growth criteria are met. The Investment Manager considers that this team-based, generalist approach enables in-depth growth stock analysis, healthy stock specific and portfolio discussions, and a streamlined decision-making process.

Benchmark uses

The Fund is actively managed and the choice of investments is not made by reference to a benchmark. The Fund's performance is compared to the Solactive GBS United States Small Cap Index (the "Benchmark"). The Benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities, which are not constituents of the Benchmark.

Redemption and Dealing shares

You can buy and sell shares on any business day (generally a day in which banks in Ireland or New York are open) on which the value of the shares are calculated, exceptions to this are more fully described in the fund holiday calendar available from the Administrator.

Distribution policy

This share class does not pay out a distribution. Any investment income generated will be reinvested.

Intended Retail Investor

This Fund is designed for retail and institutional investors seeking pooled exposure and who are comfortable with a higher level of investment risk. It is expected that the Fund will be held as part of a diversified portfolio of investments. This Fund has been designed to form part of a broader portfolio of investments. It may also be suitable as a significant component of an investors overall portfolio and should be purchased with advice or on an execution only basis by a basic investor. Investors must be able to bear loss of capital in order to seek to generate higher potential returns.

What are the risks and what could I get in return?

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level and poor market conditions could impact the value of your investment.

For other risks materially relevant to the product which are not taken into account in the summary risk indicator, please read the product's Annual Report or Prospectus available at www.candoris.nl

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 5 years. Where the fund does not have 5 years of historical data, the relevant benchmark data is used. The stress scenario shows what you might get back in extreme market circumstances.

What happens if Candoris ICAV is unable to pay out?

If the Candoris ICAV is not able to pay you out what is owed to you, you are not covered by any national compensation scheme. To protect you, the assets are held for safekeeping in accordance with the UCITS Regulations with a separate company, a depository. In worst case, however, you would lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the Fund performs as shown in the moderate scenario.

Investment: €	1,000,000	If you exit after 1 year	If you exit after 5 years (recommended holding period)
Total costs		€ 11,500.00	€ 63,037.10
Annual cost impact (*)		1.15%	1.15%

(*) This illustrates how costs reduce your return each year over the holding period.
